The world's first therapeutic
equipment for regenerative sleep

Body

Pursuing holistic happiness in life

All four essential elements must be present and in complete balance

The human body is composed of these four life elements. While the physical care of the whole body is crucial, the complete physiological and psychological maintenance is equally important.

Mind

Emotion

Spirit

Sleep Evolution

First generation: Improving physiological sleep and hence energy

Second generation: Promoting comfortable sleep and hence sleep quality

Third generation: Nursing good sleep with spinal care and anti-static elements

Fourth generation: Promoting sleep healthcare by purifying the blood and promoting deep sleep, thereby arresting aging

Fifth generation: Ensuring regenerative sleep with bedding that improves happiness, delivering comprehensive, personalized smart sleep solutions at the physiological, psychological and spiritual level.

Mankind, getting tired of walking, invented transport vehicles. Too busy to use their brains, they invented the computer. AmLife, infused with the mission to lead in cutting-edge sleep technology, has developed a new era of true happiness bedding that taking care both physical and mental health for busy men.

World class sleep experts recommend AmLife

Prof. Dr. Laura Palagini

Psychiatrist, University of Pisa, Italy
Member of Italian Association of Sleep Medicine
Sleep expert of World Sleep Society

‘Sleep is vitally important in all age groups. It directly promotes brain development and fights aging of the brain and the body. Sleep regulates the cardiovascular system, metabolism, emotional wellbeing etc., and has a profound impact on creative thinking and the immune system.’

‘AmLife offers a great, all-rounded sleep bedding system that includes a high performance mattress, healthy pillows and a special quilt.’

Why sleep is so important for physical and mental health?

Dr. Koyabu Miki

Electric potential expert from Japan /Renowned international Chinese physician

‘With the prolongation of the average life expectancy comes a new problem—bodily burden, i.e. aging and spiritual burden, i.e. insomnia. The use of electric potential and thermotherapy can effectively improve from sickness and sleeping quality, and hence helping you to regain health and youthfulness!’

The Japan ministry of health has recognized the improvement of these symptoms:

Headache

Insomnia

Neck and shoulder pains

Constipation

Indigestion

Promote blood circulation

Relieve muscle pain

Relieve fatigue

The electric potential therapy device was developed in 1928. Dr. Maki Takada of Toho University has proven that the blood stream of human body can be purified and converted to mild alkaline when exposed to negative electric field.

Regenerative Sleep Technology

Three Types of Revolutionary Therapy

Electric Potential Therapy

Thermal Therapy

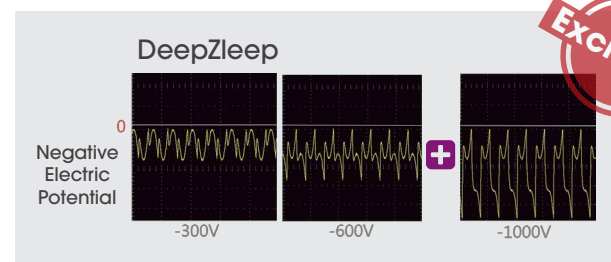

AmSonic Frequency Therapy

Guardian of the body, mind and soul

Electric Potential Therapy

Increased to 1000-volt negative potential to ensure deeper sleep, fuller cell recharge and conditioning of the deepest part of the body.

Thermal therapy

More comfortable and user-friendly temperature regulation to give more precise localized therapy, faster activation of the body's metabolism and blood/qi circulation.

Upper body thermotherapy

Lower body thermotherapy

Whole body thermotherapy

Frequency Therapy

Each part of the body has a certain resonant frequency. A harmonious vibration frequency exerts a positive impact on the body's regulatory system. Sound waves stimulate the resonant energy of each part of the body to turn on our own self-regenerating power.

Purifying the Mind

Complete elevation to a happy life

AmSonic Frequency Therapy* NEW

A brand new sleep experience with Japan's latest development of the wave frequency model, which harnesses the frequency of nature and spiritual healing music to harmonize frequency disharmony in the body, making it in sync with the natural environment so as to achieve complete relaxation and deep slumber. When the body frequency is astray, it will send out uncomfortable signals on both bodily (physical) and psychological (emotional) levels. Frequency therapy regulation starts with cells, whereby the frequency of chaotic cells is fine-tuned to restore harmony between the body and mind, thereby activating the body's ability to regenerate.

**A study by the Northwestern University School of Medicine found that low-decibel frequency therapy can help improve slow-wave sleep (i.e. deep sleep) in the elderly, and experts believe that the slow-wave sleep phase is important for memory integration. They found that people who fell asleep while listening to low-decibel frequency therapy scored three times higher than those without background music in memory tests the next morning, meaning that they literally became smarter overnight.

The Heart Of Joy Is A Good Medicine, While The Spirit Of Sorrow Withers The Bones.

Experts point out that the modern man is under strenuous psychological stress, so it is quite normal for people to experience various types of emotion. However, if an emotion such as anger, sorrow, attachment or hatred persists for too long, it will affect life expectancy and health, and even cause diseases. Everyone is well aware the fact that diseases arise from the food we eat. Yet often ignores diseases may come from unhealthy minds.

Some sounds, such as noises from vehicles and the environment, cause the body to secrete cortisol. This stress hormone causes health problems such as ulcers, increased blood pressure and heart diseases. The soothing sound of ocean waves can reduce the secretion of cortisol, which in turn has a positive impact on our overall health and prevents potential health problems.

Cleansing blood + Stimulating deep sleep
+ Purifying mind = Holistic Wellness

FIRST CLASS SLEEPING

The modern man does not get enough sleep, very much like sitting in economy class, where all kinds of limitation exist and you are unable to do anything. You can upgrade to a flatbed in business class, where you can sleep more comfortably for the time being; or get the highest enjoyment in first class, where everything you could possibly need is available. The AmLife equipment, with everything at your finger tip, gives all-rounded care to the body and mind, and lets you sleep happily and pleasantly.

However, the high-level and high-value first-class cabin sleep can only be enjoyed on a plane. It is better to invest in a long-term first-class enjoyment than spending a huge amount of money and time to experience the same thing on a flight. Now, you can enjoy good quality sleep at home, night after night.

Health and Beauty

DeepZleep plus Ampower Platinum Blanket is the perfect match for the two major circulatory systems of your body: blood and lymph

Prolonged use of this combination, you will live more younger, and your mood will become more and more pleasant. This is the life you dreamed of, isn't it?

Ampower Platinum Blanket Anti Aging Technology

Ampower Platinum blanket is 100% made in Japan. The fabric is made of platinum fibre and superior cotton that is soft and silky smooth to the touch. Its superior breathability helps resist the room's cool temperature and dampness, promote metabolism and delay ageing.

Ampower Platinum blanket is the result of the latest weaving technology based on a scientific proportion consisting of 14 types of natural ore. Unlike conventional spray coating technique-produced materials, Ampower Platinum is extremely durable and can withstand multiple washing or scrubbing.

**Lymphatic system is the body most
important detoxification system**

**One trillion vibrations per second
Activate body water molecules**

The lymphatic circulation that did not flow when sleeping is now moved.

Ampower Platinum energy changes the structure of the water molecules in the human body. With a smaller cluster of water molecules, it helps to promote the lymphatic circulation, accelerate toxin removal from the body, strengthen the body immunity, thus revitalising the body.
